Thin Solid Films 306 (1997) 359–363

thin solid films

Subject Index of Volume 306

Acceptor doping in MBE
  Optical spectroscopy of MBE grown AlGaAs/GaAs quantum wells at various acceptor doping levels, 244
AlGaAs/GaAs quantum wells
  Optical spectroscopy of MBE grown AlGaAs/GaAs quantum wells at various acceptor doping levels, 244
Alloys
  Effect of strain on light emission from pseudomorphic $Si/Si_{1-x}Ge_x/Si$ structures, 130
Amorphous materials
  Mechanical stress in amorphous Ge–As–S(Se) film/Si substrate system, 174
  Theoretical simulation of resonance Raman bands of amorphous carbon, 17
Anisotropy
  Two forms of stilbazolium merocyanine on Langmuir-Blodgett monolayers, 154
Annealing
  Mechanical stress in amorphous Ge–As–S(Se) film/Si substrate system, 174
  Preparation of $CaGa_2S_4$:Ce TFEL devices with inter-layer reaction, 160
Atomic layer epitaxy
  Ultrahigh vacuum atomic layer epitaxy of $Cd_{1-x}Mn_xTe$ layers grown on ZnTe/GaAs (100) substrates: reflection mass spectrometry studies, 266

Ba as dopant in C_{60}
  Van der Waals epitaxy with C_{60} molecules and change of the growth mechanism by Ba-doping, 313
Barium
  Properties of second phase ($BaSnO_3$, Sn) added-YBCO thick films, 147
Bilayer lipid membranes
  A combined AC–DC method for investigating supported bilayer lipid membranes, 112
Buffer layers for MBE growth
  Formation of segregated cell structure for MBE growth of mismatched semiconductors, 352

Carbon
  Study of the adhesion between a-CH films and TA6V substrates by electron-induced X-ray emission spectroscopy (EXES), 119
  Theoretical simulation of resonance Raman bands of amorphous carbon, 17
Cellular structure of In-implanted and laser annealed Si
  Formation of segregated cell structure for MBE growth of mismatched semiconductors, 352
Characterisation by SIMS, RBS and ellipsometry
  Structural and optical characterisation of undoped Si–$Si_{0.78}Ge_{0.22}$/Si(001) superlattices grown by MBE, 307
Chemical vapour
  Optical study of undoped, B or P-doped polysilicon, 67
Chemical vapour deposition (CVD)
  Measurement of the interfacial mechanical properties of a thin ceramic coating on ductile substrates, 124
Coatings
  An analytical model for predicting residual stresses in progressively deposited coatings. Part 1: Planar geometry, 23
  An analytical model for predicting residual stresses in progressively deposited coatings. Part 2: Cylindrical geometry, 34
  An analytical model for predicting residual stresses in progressively deposited coatings. Part 3: Further development and applications, 52
  Non-destructive, interferometric method for measuring the thickness of a silicon membrane, 171
  Sol-gel preparation of ZnO films with extremely preferred orientation along (002) plane from zinc acetate solution, 78
  Study of the adhesion between a-CH films and TA6V substrates by electron-induced X-ray emission spectroscopy (EXES), 119
Colored state
  Optical indices of electrochromic tungsten oxide, 10
Complex refractive index
  Optical indices of electrochromic tungsten oxide, 10
Computer simulation
  Theoretical simulation of resonance Raman bands of amorphous carbon, 17
Conductivity
  An all-solid-state electrochromic display device of prussian blue and WO_3 particulate film with a PMMA gel electrolyte, 133
  Study on a mixed conducting Langmuir–Blodgett film based on a new asymmetrical tetrathiafulvalene, 100
Copper
  Measurement of the interfacial mechanical properties of a thin ceramic coating on ductile substrates, 124
Crystallization
  Preparation of $CaGa_2S_4$:Ce TFEL devices with inter-layer reaction, 160
  Sol-gel preparation of ZnO films with extremely preferred orientation along (002) plane from zinc acetate solution, 78
Cubic GaN heteroepitaxy
  MBE growth and characteristics of cubic GaN, 231

Deposition (CVD)
  Optical study of undoped, B or P-doped polysilicon, 67
Deposition process
  Protective oxide coatings for superconducting $YBa_2Cu_3O_{7-x}$ thin films, 74
Devices grown by MBE
  Molecular beam epitaxy: from research to manufacturing, 331
Dielectric properties
  Microstructure and dielectric properties of epitaxial Bi_2WO_6 deposited by pulsed laser ablation, 6
Dielectrics
  Deposition and optical properties of optimised ZnS/Ag/ZnS thin films for energy saving applications, 92

Elsevier Science S.A.

Digital magnetic quantum wells
Growth by molecular beam epitaxy and magnetooptical studies of (100)- and (120)-oriented digital magnetic quantum well structures, 283
Diluted magnetic semiconductors
Excitons in novel diluted magnetic semiconductor quantum structures, 271
Dislocations at interfaces
Spectroscopy on MBE-grown interfaces with high spatial resolution, 214
Doping by co-deposition in MBE
Doping studies for molecular beam epitaxy of PbTe and $Pb_{1-x}Eu_xTe$, 320
Doping of fullerenes in high vacuum growth
Van der Waals epitaxy with C_{60} molecules and change of the growth mechanism by Ba-doping, 313

Elaidic acid
Synthesis and characterization of a novel amphiphilic elaidic acid derivative, 1
Electrical properties and measurement
Properties of second phase ($BaSnO_3$, Sn) added-YBCO thick films, 147
Electrical properties and measurements
Optical study of undoped, B or P-doped polysilicon, 67
Electrochromic
Optical indices of electrochromic tungsten oxide, 10
Epitaxy
High quality $YBa_2Cu_3O_{7-x}/NdAlO_3/YBa_2Cu_3O_{7-x}$ trilayers on (100) MgO for microwave applications, 141
Protective oxide coatings for superconducting $YBa_2Cu_3O_{7-x}$ thin films, 74
Surface reactions and kinetic phenomena in molecular layer epitaxy of III–V semiconductor compounds, 179
UHV reflection electron microscopy investigation of the monoatomic steps on the silicon (111) surface at homo- and heteroepitaxial growth, 205
Epitaxy of phosphorus containing semiconductor compounds
All-solid-source molecular beam epitaxy for growth of III–V compound semiconductors, 237
Epitxay
Microstructure and dielectric properties of epitaxial Bi_2WO_6 deposited by pulsed laser ablation, 6
Etching
Non-destructive, interferometric method for measuring the thickness of a silicon membrane, 171
Ethylenediamine
Synthesis and characterization of a novel amphiphilic elaidic acid derivative, 1
Evaporation
Preparation of $CaGa_2S_4$:Ce TFEL devices with inter-layer reaction, 160
Excitons in semiconductor quantum structures
Excitons in novel diluted magnetic semiconductor quantum structures, 271

Far-infrared laser structures
Doping studies for molecular beam epitaxy of PbTe and $Pb_{1-x}Eu_xTe$, 320
Field-effect transistors
Growth and characterisation of pseudomorphic Si/SiGe/Si heterostructures for *p*-channel field-effect transistors, 338
Fullerenes Van der Waals epitaxy
Van der Waals epitaxy with C_{60} molecules and change of the growth mechanism by Ba-doping, 313

Gallium arsenide
Surface reactions and kinetic phenomena in molecular layer epitaxy of III–V semiconductor compounds, 179
Giant magnetoresistance in Co/Cu multilayers
Interfacial roughness and magnetoresistance in Co/Cu multilayers, 326
Gold
Measurement of the interfacial mechanical properties of a thin ceramic coating on ductile substrates, 124
Growth on (111)A-oriented GaAs
MBE growth of lattice-matched and mismatched films on non-(001) GaAs substrates, 192

Heteroepitaxy of GaAs on In-implanted Si
Formation of segregated cell structure for MBE growth of mismatched semiconductors, 352
Heterostructures
Protective oxide coatings for superconducting $YBa_2Cu_3O_{7-x}$ thin films, 74

Impurity profile
MBE growth and characteristics of cubic GaN, 231
Infrared photoconductor arrays
Peculiarities of the MBE growth physics and technology of narrow-gap II–VI compounds, 253
Infrared spectroscopy
Non-destructive, interferometric method for measuring the thickness of a silicon membrane, 171
Interfaces
Study of the adhesion between a-CH films and TA6V substrates by electron-induced X-ray emission spectroscopy (EXES), 119
Interfacial roughness
Interfacial roughness and magnetoresistance in Co/Cu multilayers, 326

Langmuir–Blodgett film
Study on a mixed conducting Langmuir–Blodgett film based on a new asymmetrical tetrathiafulvalene, 100
Langmuir–Blodgett films
Synthesis and characterization of a novel amphiphilic elaidic acid derivative, 1
Langmuir–Blodgett films (LB films)
Two forms of stilbazolium merocyanine on Langmuir-Blodgett monolayers, 154
Laser ablation
High quality $YBa_2Cu_3O_{7-x}/NdAlO_3/YBa_2Cu_3O_{7-x}$ trilayers on (100) MgO for microwave applications, 141
Microstructure and dielectric properties of epitaxial Bi_2WO_6 deposited by pulsed laser ablation, 6
Protective oxide coatings for superconducting $YBa_2Cu_3O_{7-x}$ thin films, 74
Laser uridation
Characterization of femtosecond laser pulses with GaN thin films, 137
Low dimensional structures
Molecular beam epitaxy: from research to manufacturing, 331
Luminescence
Chemical influences on the luminescence of ruthenium diimine complexes and its response to oxygen, 163
Effect of strain on light emission from pseudomorphic $Si/Si_{1-x}Ge_x/Si$ structures, 130
Luminescence of superlattices
Growth and properties of nonperiodic multiple thin films, 346

Magnetic coupling in Co/Cu multilayers
Interfacial roughness and magnetoresistance in Co/Cu multilayers, 326
Magnetoconductance in submicron wires
Fabrication and magnetoconductance studies on submicron wires and films of MBE grown CdTe:In, 291

Magnetooptics of quantum structures
Growth by molecular beam epitaxy and magnetooptical studies of (100)- and (120)-oriented digital magnetic quantum well structures, 283
Magnetron sputtering
Characterization of yttria-stabilized zirconia thin films grown by planar magnetron sputtering, 86
MBE digital growth technique
Excitons in novel diluted magnetic semiconductor quantum structures, 271
MBE-grown CdTe:In
Fabrication and magnetoconductance studies on submicron wires and films of MBE grown CdTe:In, 291
MBE growth
Influence of Al adsorption on In and Ga thermal desorption from InP and GaAs surfaces heated under As_4 flux, 248
MBE growth of Bragg mirrors
Multiple quantum well exciton Bragg mirrors, tunable by magnetic field, 296
MBE growth of Ge on Si(111) Monte-Carlo simulation
Monte-Carlo simulation of Ge on Si(111) MBE growth: analysis of percolative structure, 220
MBE growth of IV–VI compounds
Doping studies for molecular beam epitaxy of PbTe and $Pb_{1-x}Eu_xTe$, 320
MBE growth simulation
Distributed growth model used for the interpretation of RHEED intensity oscillations observed during the growth of Pb on Si(111) substrates, 228
MBE of AlGaAs and SiGe heterostructures
Growth and properties of nonperiodic multiple thin films, 346
MBE of MCT
Peculiarities of the MBE growth physics and technology of narrow-gap II–VI compounds, 253
MBE of *p*-type GaN
MBE growth and characteristics of cubic GaN, 231
Metallic multilayer structures
Interfacial roughness and magnetoresistance in Co/Cu multilayers, 326
Micro-RHEED/SEM MBE
Arsenic pressure dependence of inter-surface diffusion in MBE of GaAs studied by the microprobe-RHEED/SEM MBE system, 187
Molecular beam epitaxy
Arsenic pressure dependence of inter-surface diffusion in MBE of GaAs studied by the microprobe-RHEED/SEM MBE system, 187
Growth by molecular beam epitaxy and magnetooptical studies of (100)- and (120)-oriented digital magnetic quantum well structures, 283
Kinetic model for molecular beam epitaxial growth on a singular surface, 105
MBE growth of lattice-matched and mismatched films on non-(001) GaAs substrates, 192
Molecular beam epitaxy: from research to manufacturing, 331
Molecular beam epitaxy of Si and Ge
Surface processes and phase diagrams in MBE growth of Si/Ge heterostuctures, 299
Molecular layer epitaxy
Surface reactions and kinetic phenomena in molecular layer epitaxy of III–V semiconductor compounds, 179
Monolayers
Mass transfer surface diffusion of noble gases, 62
Two forms of stilbazolium merocyanine on Langmuir-Blodgett monolayers, 154
Multilayers
High quality $YBa_2Cu_3O_{7-x}/NdAlO_3/YBa_2Cu_3O_{7-x}$ trilayers on (100) MgO for microwave applications, 141
Multiple quantum wells
Multiple quantum well exciton Bragg mirrors, tunable by magnetic field, 296

Nitrides
Characterization of femtosecond laser pulses with GaN thin films, 137
Nonperiodic multiple thin films
Growth and properties of nonperiodic multiple thin films, 346

Optical coatings
Deposition and optical properties of optimised ZnS/Ag/ZnS thin films for energy saving applications, 92
Optical properties
An all-solid-state electrochromic display device of prussian blue and WO_3 particulate film with a PMMA gel electrolyte, 133
Characterization of femtosecond laser pulses with GaN thin films, 137
Deposition and optical properties of optimised ZnS/Ag/ZnS thin films for energy saving applications, 92
Optical study of undoped, B or P-doped polysilicon, 67
Optical spectroscopy
Optical spectroscopy of MBE grown AlGaAs/GaAs quantum wells at various acceptor doping levels, 244
Two forms of stilbazolium merocyanine on Langmuir-Blodgett monolayers, 154
Organometallic vapour deposition
Characterization of femtosecond laser pulses with GaN thin films, 137
Oxygen
Chemical influences on the luminescence of ruthenium diimine complexes and its response to oxygen, 163

Patterned surfaces
Arsenic pressure dependence of inter-surface diffusion in MBE of GaAs studied by the microprobe-RHEED/SEM MBE system, 187
Pb heteroepitaxy on Si(111)
Distributed growth model used for the interpretation of RHEED intensity oscillations observed during the growth of Pb on Si(111) substrates, 228
Photoluminescence
MBE growth and characteristics of cubic GaN, 231
Photon emission
Chemical influences on the luminescence of ruthenium diimine complexes and its response to oxygen, 163
Plasma-assisted MBE
MBE growth and characteristics of cubic GaN, 231
Plasma bombardment
Characterization of yttria-stabilized zirconia thin films grown by planar magnetron sputtering, 86
Polariton states tunable by magnetic field
Multiple quantum well exciton Bragg mirrors, tunable by magnetic field, 296
Polymer
An all-solid-state electrochromic display device of prussian blue and WO_3 particulate film with a PMMA gel electrolyte, 133
Pseudomorphic Si/SiGe structures
Growth and characterisation of pseudomorphic Si/SiGe/Si heterostructures for *p*-channel field-effect transistors, 338

Quantum wires and films
Fabrication and magnetoconductance studies on submicron wires and films of MBE grown CdTe:In, 291

Raman scattering
Theoretical simulation of resonance Raman bands of amorphous carbon, 17
Raman scattering in strained-layer heterostructures
Structural and optical characterisation of undoped Si–$Si_{0.78}Ge_{0.22}$/Si(001) superlattices grown by MBE, 307

Reciprocal space mapping
Structural characterization of self-assembled quantum dot structures by X-ray diffraction techniques, 198
Reflection electron microscopy
UHV reflection electron microscopy investigation of the monoatomic steps on the silicon (111) surface at homo- and heteroepitaxial growth, 205
Reflection mass spectrometry
Influence of Al adsorption on In and Ga thermal desorption from InP and GaAs surfaces heated under As_4 flux, 248
Ultrahigh vacuum atomic layer epitaxy of $Cd_{1-x}Mn_xTe$ layers grown on ZnTe/GaAs (100) substrates: reflection mass spectrometry studies, 266
Resistivity
A combined AC–DC method for investigating supported bilayer lipid membranes, 112
RHEED intensity oscillations
Distributed growth model used for the interpretation of RHEED intensity oscillations observed during the growth of Pb on Si(111) substrates, 228
Monte-Carlo simulation of Ge on Si(111) MBE growth: analysis of percolative structure, 220
RHEED studies of surface reconstruction
One-dimensional structures on Si(111) observed by RHEED, 224

Scanning tunneling microscopy of metallic layered structures
Interfacial roughness and magnetoresistance in Co/Cu multilayers, 326
Schottky barriers
Spectroscopy on MBE-grown interfaces with high spatial resolution, 214
Self-assembled quantum dots
Structural characterization of self-assembled quantum dot structures by X-ray diffraction techniques, 198
Selfordering of metallic films
One-dimensional structures on Si(111) observed by RHEED, 224
Selforganization in heteroepitaxy on the Si (111)7 × 7 surface
Surface processes and phase diagrams in MBE growth of Si/Ge heterostuctures, 299
Semiconductor laser structures
All-solid-source molecular beam epitaxy for growth of III–V compound semiconductors, 237
Sensors
Chemical influences on the luminescence of ruthenium diimine complexes and its response to oxygen, 163
$Si_{1-x}Ge_x$/Si Heterostructures
Surface processes and phase diagrams in MBE growth of Si/Ge heterostuctures, 299
Silicide–silicon interfaces
Spectroscopy on MBE-grown interfaces with high spatial resolution, 214
Silicon
Effect of strain on light emission from pseudomorphic $Si/Si_{1-x}Ge_x/Si$ structures, 130
Non-destructive, interferometric method for measuring the thickness of a silicon membrane, 171
UHV reflection electron microscopy investigation of the monoatomic steps on the silicon (111) surface at homo- and heteroepitaxial growth, 205
Silicon compounds MBE
Growth and characterisation of pseudomorphic Si/SiGe/Si heterostructures for *p*-channel field-effect transistors, 338
Silicon oxide
Measurement of the interfacial mechanical properties of a thin ceramic coating on ductile substrates, 124
Silver
Deposition and optical properties of optimised ZnS/Ag/ZnS thin films for energy saving applications, 92
$Si–Si_{1-x}Ge_x$ superlattices
Structural and optical characterisation of undoped $Si–Si_{0.78}Ge_{0.22}$/Si(001) superlattices grown by MBE, 307
Solid-source MBE
All-solid-source molecular beam epitaxy for growth of III–V compound semiconductors, 237
Strained layer heteroepitaxy
MBE growth of lattice-matched and mismatched films on non-(001) GaAs substrates, 192
Stress
An analytical model for predicting residual stresses in progressively deposited coatings. Part 2: Cylindrical geometry, 34
An analytical model for predicting residual stresses in progressively deposited coatings. Part 3: Further development and applications, 52
Effect of strain on light emission from pseudomorphic $Si/Si_{1-x}Ge_x/Si$ structures, 130
Mechanical stress in amorphous Ge–As–S(Se) film/Si substrate system, 174
Stresses
An analytical model for predicting residual stresses in progressively deposited coatings. Part 1: Planar geometry, 23
Structure of heteroepitaxial MCT
Peculiarities of the MBE growth physics and technology of narrow-gap II–VI compounds, 253
Superconductivity
High quality $YBa_2Cu_3O_{7-x}/NdAlO_3/YBa_2Cu_3O_{7-x}$ trilayers on (100) MgO for microwave applications, 141
Properties of second phase ($BaSnO_3$, Sn) added-YBCO thick films, 147
Surface diffusion
Arsenic pressure dependence of inter-surface diffusion in MBE of GaAs studied by the microprobe-RHEED/SEM MBE system, 187
Kinetic model for molecular beam epitaxial growth on a singular surface, 105
Mass transfer surface diffusion of noble gases, 62
Surface melting
Mass transfer surface diffusion of noble gases, 62
Surface phenomena
UHV reflection electron microscopy investigation of the monoatomic steps on the silicon (111) surface at homo- and heteroepitaxial growth, 205
Surface reactions
Surface reactions and kinetic phenomena in molecular layer epitaxy of III–V semiconductor compounds, 179
Synthesis
Study on a mixed conducting Langmuir–Blodgett film based on a new asymmetrical tetrathiafulvalene, 100
Synthesis and characterization of a novel amphiphilic elaidic acid derivative, 1

Tetrathiafulvalene
Study on a mixed conducting Langmuir–Blodgett film based on a new asymmetrical tetrathiafulvalene, 100
Thin film growth in ultrahigh vacuum
Ultrahigh vacuum atomic layer epitaxy of $Cd_{1-x}Mn_xTe$ layers grown on ZnTe/GaAs (100) substrates: reflection mass spectrometry studies, 266
Thin films
Characterization of yttria-stabilized zirconia thin films grown by planar magnetron sputtering, 86
Tin
Properties of second phase ($BaSnO_3$, Sn) added-YBCO thick films, 147
Tungsten oxide
Optical indices of electrochromic tungsten oxide, 10

UHV surface adsorption and thermal desorption
Influence of Al adsorption on In and Ga thermal desorption from InP and GaAs surfaces heated under As_4 flux, 248
Ultrahigh vacuum deposition
Interfacial roughness and magnetoresistance in Co/Cu multilayers, 326

Vacancies
Mass transfer surface diffusion of noble gases, 62
Vicinal Si(111) surfaces
One-dimensional structures on Si(111) observed by RHEED, 224

WO_3
An all-solid-state electrochromic display device of prussian blue and WO_3 particulate film with a PMMA gel electrolyte, 133

X-ray diffraction
Preparation of $CaGa_2S_4$:Ce TFEL devices with inter-layer reaction, 160
Structural characterization of self-assembled quantum dot structures by X-ray diffraction techniques, 198
X–ray emission
Study of the adhesion between a-CH films and TA6V substrates by electron-induced X-ray emission spectroscopy (EXES), 119

Yttria-stabilized zirconia
Characterization of yttria-stabilized zirconia thin films grown by planar magnetron sputtering, 862e
Zinc oxide
Sol-gel preparation of ZnO films with extremely preferred orientation along (002) plane from zinc acetate solution, 78
